Education

University of Waterloo 2022 - 2027
Bachelor of Computer Science **GPA: 3.9/4.0**
- Relevant Courses: Artificial Intelligence, Distributed Systems, Big Data, Operating Systems, Algorithms

Skills

Languages: Python, TypeScript, JavaScript, C++, C, Go, Java, SQL, HTML, CSS

Technologies: React, Next.js, Node.js, Flask, Django, Spring Boot, Tailwind

Tools: PostgreSQL, MongoDB, Redis, AWS, Vercel, Docker, Kubernetes, Temporal, Apache Kafka, Git

Experience

Databricks Oct 2026 – Present
Software Engineering Intern *Mountain View, CA*
- Incoming Winter 2027 to work on enterprise agents

Amazon Web Services (AWS) May 2026 – Aug 2026
Software Development Engineer Intern *Vancouver, BC*
- Built an AI agent that generates CloudWatch pipeline configurations from natural language across **40** ingestion sources
- Deployed an agentic workflow that automatically keeps the agent's RAG knowledge base up to date across rule changes

BitGo Jan 2026 – Apr 2026
Software Engineering Intern *Palo Alto, CA*
- Designed BitGo's KYB APIs, enabling **5,000** institutions to programmatically complete business identity verification through automated case processing, requirement resolution, and license provisioning

Faire May 2025 – Aug 2025
Software Engineering Intern *Waterloo, ON*
- Engineered real-time approval flows for Open with Faire, automatically evaluating **10,000** new monthly submissions
- Built a shared developer portal that improved developer velocity across Next.js microfrontends by **4.2x**

Vivid Seats Sept 2024 – Dec 2024
Software Engineering Intern *Toronto, ON*
- Shipped league standings, geolocated team lists, top performers/venues, and advanced filtering for sports category pages on a client-facing web app that serves **4 million** monthly users using **Next.js** and **Node.js**
- Improved web performance by **63%** by reducing memory usage, enhancing SEO, and parallelizing server side requests

Workplace Safety & Insurance Board (WSIB) Jan 2024 – Apr 2024
Full Stack Developer Intern *Toronto, ON*
- Built a generative AI application that simplifies insurance documents to improve client policy comprehension

Projects

QueryGPT | *TensorFlow, Next.js, Typescript, Flask, MongoDB*
- Sports betting web app that utilizes machine learning models to predict outcomes of sports events and identify arbitrage

Threddit | *React.js, Node.js, MongoDB, LangChain, Sass*
- Platform to discover, save, and showcase coding projects, snippets, and personalized boards, scaling to **150** users
